ATT 279: AUTOMOTIVE DYNAMOMETER AND TESTING

In this course, students will learn about data acquisition methods used in modern automotive powertrains. Students will learn the principles of strain gauge pressure sensors and Wheatstone bridge torque transducers. Students also gain practical experience in the laboratory, calibrating and validating the signals produced from a variety of automotive testing equipment. The students will develop and execute a test validation protocol on engine dynamometer stands. This course was previously ASV 279. Level I
