
2023-24 ACADEMIC COURSES

CNT 206 : INTRODUCTION TO NETWORKS

In this course, students are introduced to the architecture, structure, functions, components, and models of the Internet and other computer networks. The principles and structure of internet protocol (IP) addressing and the fundamentals of Ethernet concepts, media, and operations are introduced to provide a foundation for the curriculum. By the end of the course, students will be able to build simple local area networks (LANs), perform basic configurations for routers and switches, and implement IP addressing schemes. This course is part of the CISCO networking curriculum at WCC and helps students prepare for a portion of the CISCO Certified Network Associate (CCNA) certification examination.

Level I Prereq: Academic Reading and Writing Levels of 6

Description	Hours
Credits	4
Lecture Hours	60
Clinical Hours	0
