

2021-22 ACADEMIC COURSES

CSS 210 : NETWORK PERIMETER PROTECTION

In this course, students learn how to implement security solutions that reduce the vulnerability of computer networks. Topics include principles of network security, packet filtering with ACLs, network, configuring and deploying multiple firewall topologies using Cisco devices, implementing virtual private networks (VPNs) and user authentication. This course uses the Cisco Networking Academy curriculum to help students prepare for the CCNA Security certification examination. The titles of this course were previously Computer Security IV and Basic Network Perimeter Protection.

Level I Prereq: Academic Reading and Writing Levels of 6; Academic Math Level 1

Description	Hours
Credits	4
Lecture Hours	60
