
CIS 121: LINUX/UNIX I: FUNDAMENTALS

In this course, students are introduced to UNIX and Linux tools. The course covers the UNIX/Linux file system, communication with other users, editors, file manipulation and processing, basics of pipes and redirection, simple shell programming, and a basic introduction to Linux. This course is designed to help students prepare for the LPI Linux Essentials Certificate.

[Level I Prereq:](#) Academic Reading and Writing Levels of 6
