CIS 208: LINUX/UNIX III: INTERMEDIATE SYSTEM ADMINISTRATION, NETWORKING, AND SECURITY

In this third of four courses on the Linux operating system, Linux networking theory is discussed and practical application of the theory is shown through lab exercises. Students should be familiar with common Linux distributions and comfortable with system administration activities to succeed in this course. This course is designed to help students prepare for Linux Certification Exams.

Level I Prereq: Academic Reading and Writing Levels of 6
