## CON 180: INTRODUCTION TO GREEN BUILDING (WCC DISCONTINUED COURSES)

---

This class is no longer offered as of Fall 2020.

In this course, students will be introduced to aspects of green and sustainable building practices. Beginning with an overview of the environment and the history of the green construction movement, students will learn sustainable construction theories and how they differ from standard construction practices. Topics include LEED certification, building systems, materials, site selection, air quality and remodeling.

[Level I Prereq:](#) Academic Reading and Writing Levels of 6; Academic Math Level 3
