

2021-22 ACADEMIC COURSES

PSY 296 : NEUROPSYCHOLOGY OF ADDICTION

In this course, students will study the basic principles of pharmacology, including both pharmacokinetics and pharmacodynamics and the application of these principles to addictive drugs. In particular, students will focus on the functioning of the nervous system with an emphasis on neurotransmission, the evolution of our understanding of the biological mechanisms of addiction, and various physiological effects, including the mechanism of action of both legal and illegal psychoactive drugs.

Level I Prereq: Academic Reading and Writing Levels of 6

Description	Hours
Credits	3
