

2024-25 ACADEMIC PROGRAMS

OCCUPATIONAL STUDIES (APOST)

Associate in Applied Science

This program allows students to earn an Associate in Applied Science degree by building on occupational/technical courses and certificates. This option can be selected if an associate degree is required or preferred as a condition for employment or advancement in a field. The program also allows students to combine coursework from several occupational areas to prepare for a job that requires multidisciplinary skills. Meet with a divisional counselor or faculty advisor for assistance in developing a program of study. A counselor can help determine career interests and educational goals, as well as provide transfer and career information.

This is a **high demand, high skill** and **high wage** program as defined by the [Michigan Community College Network](#).
