

## 2021-22 ACADEMIC PROGRAMS

### HEALTH ADMINISTRATION (ASHA)

#### Associate in Science

The Health Administration program provides students with the skills necessary for the entry-level employment in healthcare management. Students in this industry lead and oversee the operation of complex health care entities including hospitals, outpatient facilities, health care systems, pharmacies, long-term care facilities, mental health centers, fitness centers, insurance companies, schools and public health systems. Upon completion of this associate degree, the student should be able to: understand medical terminology, apply health care knowledge in economic analysis, accounting, and effectively communicate with team members.

This is a **high demand, high skill and high wage** program as defined by the [Michigan Community College Network](#).

#### Description

The Health Administration program provides students with the skills necessary for the entry-level employment in healthcare management. Students in this industry lead and oversee the operation of complex health care entities including hospitals, outpatient facilities, health care systems, pharmacies, long-term care facilities, mental health centers, fitness centers, insurance companies, schools and public health systems. Upon completion of this associate degree, the student should be able to: understand medical terminology, apply health care knowledge in economic analysis, accounting, and effectively communicate with team members.

#### Course Requirements

##### First Semester

Class	Title	Minimum Credits
BIO 109 or BIO 111	Essentials of Human Anatomy and Physiology Anatomy and Physiology - Normal Structure and Function	4-5
MTH 160 or Elective	Basic Statistics Any math level 4 or higher course	3-4
Elective	Writing Elective(s)	3-4
