

2024-25 ACADEMIC PROGRAMS

MAMMOGRAPHY (CPMAM)

Post-Associate Certificate

The Mammography program is a post-associate advanced certificate that is designed for ARRT-registered radiologic technologists.

This program prepares students to perform screening and diagnostic mammography procedures using dedicated mammography equipment. Upon successful completion of the Mammography program, students are eligible to take the ARRT post-primary certification examination in mammography. In an effort to accommodate working radiologic technologists, this program will be offered in a blended-format.

This is a **high skill** and **high wage** program as defined by the [Michigan Community College Network](#).
