

2024-25 ACADEMIC PROGRAMS

ELECTRIC VEHICLE (EV) SAFETY & FUNDAMENTALS (CTEVSF)

Certificate

Do you have another career in mind? [Search for careers](#)

Description

In this program, students will be introduced to the rapidly growing electric vehicle (EV) market. Students will learn the safety standards, precautions, and best practices needed when working around EV's. Topics of study will include basic electrical system identification and testing along with ever evolving new technologies incorporated in alternativeenergy vehicles such as EV's. This mini-certificate will prepare students for EV specific ASE testing required for the industry.
