

2021-22 ACADEMIC PROGRAMS

LINUX/UNIX SYSTEMS (CTLUX)

Certificate

This certificate helps prepare students to complete the Linux+ and LPIC-1 industry certificates. Linux is a popular web server, file server, and database hosting platform. It is commonly used in everything from mobile computing devices to large scale data center environments and supercomputers.

This program is designed for the current or future IT professional.

This is a **high skill** and **high wage** program as defined by the [Michigan Community College Network](#).
