

2024-25 ACADEMIC PROGRAMS

MEDICAL ASSISTING (CTMA2)

Certificate

In this program, you'll gain the comprehensive skills to manage both administrative and clinical duties such as coding, scheduling, arranging for laboratory services, instructing patients about medication and special diets and drawing blood.

This program will prepare you to become a multi-skilled professional for a career in physician's offices, medical clinics, laboratories and other ambulatory health care facilities. Graduates will be prepared to sit for the medical assisting certification exam.
